

How animal sourced food nourishes the world in times of climate change.

Tuesday 5 December

11:30 -13:00 (GMT +4) – SE room 9

Background and objectives

With the acknowledgement that agrifood systems play a role in climate change, comes a consideration of the trade-offs and synergies with respect to nutrition security and sustainable agrifood systems. When people are at their full potential, they can contribute their energy and time to other considerations than their health.

Currently there is no country on track with regards to food and nutrition security. Malnutrition, in all its forms, is a global concern that has lasting health, developmental and economic impacts for individuals, communities and nations.

Nutrient needs of humans vary substantially over their life course. While there are a variety of dietary patterns that can meet those needs, foods that are rich in nutrients are a critical part of a healthy diet. Terrestrial animal source foods provide energy and many essential nutrients, such as protein, fatty acids and several vitamins and minerals that are less common in other food types.

This session will explore the interaction between nutrition security and climate change and focus how terrestrial animal source foods contribute to nutrition security.

Expected outcomes

- Raise awareness of the interaction of the different dimensions of sustainability and the potential trade offs when one dimensions is the sole focus
- Enable data and knowledge exchange on the role animals source foods play in nutrition security
- Promote a holistic approach that includes all relevant stakeholders, recognising the interconnectedness of social, economic and environmental considerations in livestock farming.

Moderator

- Ms Caroline Emond
IDF Director General

Speakers

- H. E Carlos Cherniak
Chair of the Subcommittee of Livestock - FAO
- Dr Lynnette Neufeld

- Director of the Food and nutrition division of FAO
- Dr Namukolo Covic
ILRI Director General's Representative to Ethiopia
- Mr Lloyd Day
Deputy Director General, IICA
- Ms Smriti Singh
Manager, NDDDB Foundation
- Mr Facundo Etchebehere
Global VP of Sustainability at Danone
- Ms Evangelista Chekera
Farmer leader, WFO

Program

11:30	Moderator	Ms. Caroline Emond	IDF DG
11:35	Welcoming remarks	Amb. Carlos Cherniak,	Chair of the Subcommittee of Livestock - FAO
11:40	Contribution of terrestrial animal source food to healthy diets for improved nutrition and health outcomes	Dr Lynnette Neufeld,	Director of the Food and nutrition division of FAO
12:00	Role of livestock to feed vulnerable populations in Africa	Dr Namukolo Covic	ILRI Director General's Representative to Ethiopia
12:15	School feeding programs, role of TASF in these.	Mr Lloyd Day	Deputy Director General, IICA
12:30	Role of dairy in nourishing a billion people	Ms. Smriti Singh	Manager, NDDDB Foundation
12:40	Nutrition – climate action, how dairy is part of the solutions	Jeanette Coombs	Sustainability Advocacy Director, Danone
12:50	Nourishing the future: the young farmers' vision	Ms Evangelista Chekera	Youth farmer leader, WFO
Q&A (if time allows)			
12:55	Concluding remarks	Ms. Caroline Emond
